

EMMANUEL ABANOBI

Full Stack Developer

📞 Not provided @ abanobie01@gmail.com 🔗 Not provided 📍 Not provided

SUMMARY

I am a versatile Full Stack Developer with robust experience in both front-end and back-end development. I design dynamic, responsive web and mobile applications using modern frameworks like Vue.js and Flutter, and I build scalable RESTful APIs with Node.js. Skilled in agile methodologies and automated testing, I am committed to delivering high-quality solutions and continuously expanding my expertise

EXPERIENCE

Software Engineer

Start Up Company

📅 06/2024 - 01/2025 📍 Not specified

A start-up that focuses on developing mobile applications

- Defined the vision and scope of the Destination App by conducting market research and gathering user feedback
- Designed a responsive, intuitive user interface using Vue.js, Nuxt.js, and Tailwind CSS
- Implemented interactive map functionalities and real-time geolocation services using external APIs
- Built robust RESTful API endpoints with Node.js and Express
- Conducted comprehensive testing, including cross-browser/device compatibility and automated validation
- Managed code versioning with Git/GitHub and implemented CI/CD pipelines using GitHub Actions
- Developed detailed technical documentation for ongoing maintenance and future enhancements

Software Engineer Intern

Upwork

📅 06/2023 - 03/2024 📍 Canada, KY

An online platform connecting freelancers with clients for various projects

- Participated in meetings to understand client requirements and supported the documentation of technical specifications
- Collaborated with the development team on designing and building a fully functional website
- Helped implement user interfaces using Vue.js/Nuxt.js and assisted in developing server-side functionalities with Node.js and Express.js
- Contributed to testing, debugging, and optimizing website performance across various browsers and devices
- Supported the team during the deployment process and maintained codebases using Git and GitHub

EDUCATION

Bachelor of Science in Computer Science

Federal University of Technology Owerri

📅 09/2020 - 01/1970 📍 Lagos, Lagos

STRENGTHS

Full Stack Development

Proficient in both front-end and back-end development, adept at designing user-centric applications

Agile and CI/CD Practices

Strong skills in Agile methodologies, continuous integration, and automated testing
